Design Challenge

Create a Digital Citizen Mascot

Why is it important to be safe, kind and aware online?
What research do you need to do?

What is your mascot's name?
How will others identify your important cause?

What special powers will your mascot have?
How will these powers help others?

What have you learnt?
How will you impact positive change when you create, consider and connect online?

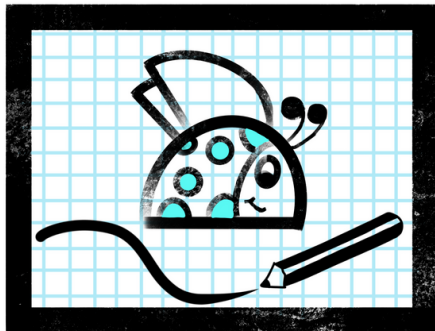

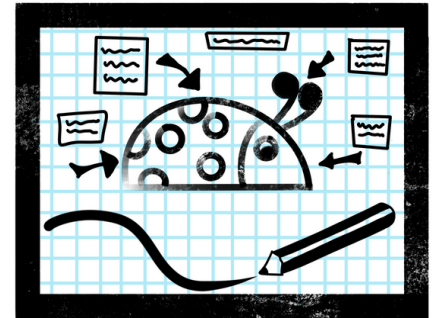

Design

Create a sketch. List key features you would like to include and why.

Think about how your mascot will appear.

What will draw attention and interest?

What key features will it have? How will you communicate your important message?

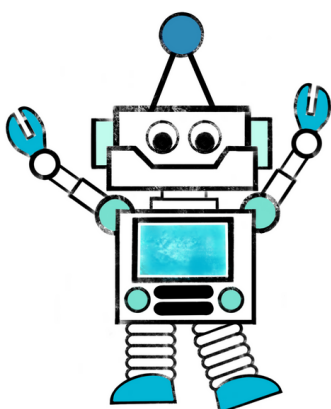

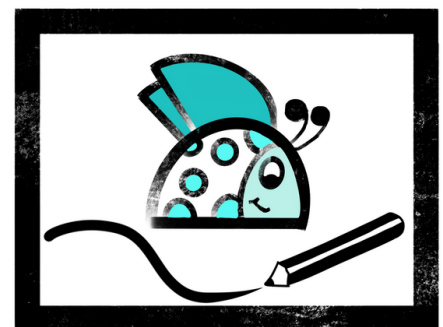

Refine

Ask for feedback! It's important to hear from others. Go back to your sketch. Check you have included everything you wanted. Is something missing which would take your mascot to the next level?

Create

Make your mascot! You might choose to build your design or use digital tech to bring your creation to life.

Think about the materials you will use. You may need to test different ones.

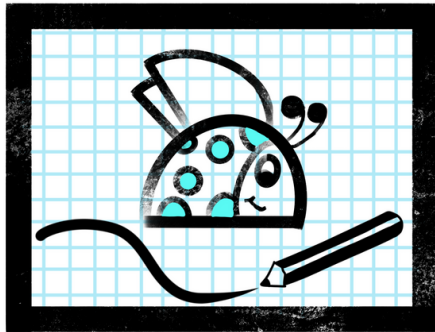

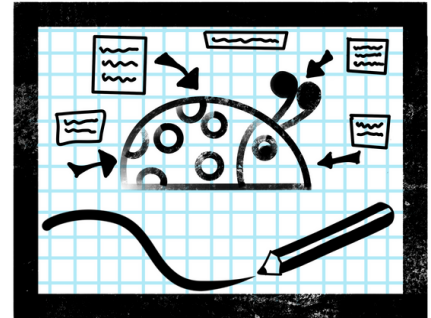

Celebrate

Share your mascot with your class, friends or family!
Can you share to help others to be more aware?

Design

How will your mascot help and inform others about digital citizenship?

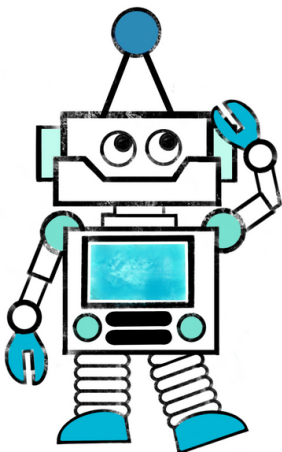

Refine

Based on feedback what changes can you make to improve your design?

Create

What materials or technology will best suit your design and enable you to bring it to life?

Celebrate

How will you share your important message?
