

DEMOCRACY HIVE

An activity where students can create a Hive by connecting **ideas, knowledge and wonderings** around Democracy.

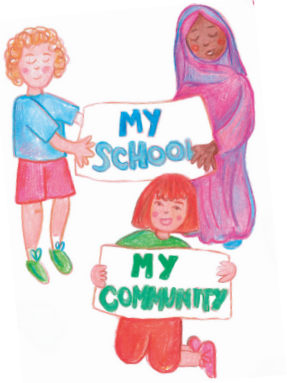

In small groups,
students are given
three piles of hexagon tiles...

To build a Hive, each new hexagon must be related to the hexagons it is connected to.

Each group **shares their ideas and finds connections** between their own knowledge, wonderings and the democracy poster elements to build their Hive. Once their Hive is finished, encourage students to **present** their unique Hive to another group!
